

EXPANDER ENERGY INC.
INNOVATIVE ENERGY SOLUTIONS

NEWS RELEASE

Expander Energy appoints WorleyParsons Canada as its preferred Engineering Firm.

Calgary, Alberta - (February 11, 2013) Mr. James Ross, CEO of Expander Energy is pleased to announce an agreement with WorleyParsons Canada as the company's preferred engineering provider.

WorleyParson's is a global provider of technical, project and operational support services for the energy industry and has been integral to the development of the company's patented process Enhanced Fischer-Tropsch® and patent pending process FTCrude™. All of Expander's processes maximize the conversion of carbon to valuable synthetic fuels; SynDiesel™, SynJet™ and FTCrude™. Our processes increase yield by up to 30% and reduce CO² emissions by up to 80%. Expander is the sole owner and marketer of these patents.

"We believe that WorleyParsons expertise in all areas of energy development and their comprehensive global network will be invaluable to bringing Expander's innovations to commercialization", said Mr. Ross.

Expander Energy Inc. is a Calgary based developer and licensor of processes designed to manufacture high performance, clean burning, zero sulphur synthetic fuels from carbon rich sources such as bitumen and heavy oil residuals, natural gas, natural gas liquids, biomass, and municipal solid waste.
