

EXPANDER ENERGY INC.
INNOVATIVE ENERGY SOLUTIONS

NEWS RELEASE

Financial Post Article on Expander Energy

Calgary, AB. (July 29, 2013) – The Financial Post published an article on Expander Energy in its July 26th edition and is now available online at <http://bit.ly/17GJE1U>.

In the article, FP columnist Claudia Cattaneo outlines how Expander's proprietary FTCrude[®] technology can be a major factor in solving the greenhouse gas emissions in processing bitumen from Alberta's oil sands.

Expander CEO James Ross is quoted in regard to the major benefits that can be realized from utilizing FTCrude[®]

"The real advantage of Expander is that you maximize all the carbon that is available in the system," CEO Jim Ross said in an interview.

"The bottom line is a minimum 50% reduction in CO₂, and we think we can see a reduction of as much as 80%."

About Expander Energy

Expander Energy is a leading developer and licensor of processes to convert carbon sources into valuable synthetic fuels. Our engineered fuels are ultra-clean burning and complement existing transportation fuel infrastructure and current engine technologies. Our fuels increase production yield, reduce GHG emissions, and are produced from carbon rich materials such as natural gas, biomass, bitumen residuals, petcoke and municipal solid waste. We strive to deliver an alternative, drop in fuel through patented technology to provide economic growth for Alberta and Canada while being environmentally conscious. Expander Energy Inc. is a privately held energy company located in Calgary, Alberta, Canada.
