Expander Energy, World Heavy Oil Congress Presentation, and HydroCarbon Processing Article

Calgary, AB: Steve Kresnyak and Jan Wagner of Expander made a major presentation at the World Heavy Oil Congress held in New Orleans earlier in March.

The WHOC is the premier global heavy oil event as it features over 1,000 delegates from over 30 countries and was an excellent vehicle to present the company's proprietary technology. In addition, Expander held meetings with former U.S. Energy Secretary Dr. Stephen Chu and many other key industry figures.

Also there is an excellent article about the Expander Fischer-Tropsch patented technologies in the latest HydroCarbon Processing Magazine, entitled "Convert heavy oil residue to synthetic fuel" authored by Steve Kresnyak, Steve Price and Jan Wagner.

"Expander's patented innovations like FTCrude[®] are gaining increasing profile and recognition as we move towards the commercial implementation of our processes" said Expander CEO, James Ross.
