

Expander Appoints Gordon Crawford as Vice President of Engineering

Calgary, Alberta Canada (April 8, 2020), For Immediate Release. Expander Energy Inc. is pleased to announce the appointment of Gordon N. Crawford to the new position of Vice President of Engineering, for which he brings more than 30 years' experience in the oil and gas industry. His extensive knowledge and leadership skills in the management of major innovative projects will be instrumental in helping Expander develop and execute new methods of carbon management utilizing our extensive portfolio of patents. Gord has been a consultant for Expander over the past year and was a key element in Expander's latest patent in renewable fuels.

Prior to joining Expander, Mr. Crawford held management positions in several prestigious engineering firms in Calgary and Edmonton, and most recently, was a Co-Founding Partner and Vice President of an established mid sized Edmonton EPC engineering firm. He is well-respected member of the Alberta engineering community. His competence in management and operations in the EPC environment and his relationships in the oil patch will be instrumental in Expander obtaining and managing financing for and the building of Expander's clean fuel facilities.

"I had the pleasure of working with Gord on a previous project and was very pleased to be able to bring him into the Expander enterprise and its culture of innovation. Gord is enthusiastic and passionate about the clean energy sector and is very knowledgeable with Expander's patented technologies. We are very excited about having Gord overseeing the next phase of commercializing Expander's first-of-a-kind Biomass/Gas to Liquids technology at our Slave Lake AB facility. I have no doubt that Gord is the perfect fit for this position," says Expander CEO Steve Price.

Expander and partners are building Canada's first commercial demonstration Biomass to Diesel facility at Slave Lake, Alberta, utilizing Expander's patented biomass and gas to liquids ("BGTL™") design. The plant will produce clean burning renewable synthetic fuel (SynDiesel® and SynJet®) from a variety of biomass feedstocks. Currently, Expander (and partner Rocky Mountain GTL) is in the final stages of construction of a 500 BPD Gas to Liquids (GTL) facility in Carseland Alberta.

About Expander Energy

Expander Energy is a sustainable energy production company providing innovative solutions for the environmental and economic production of Synthetic Fuels.

We foster a culture of innovation through which we create and develop new methods of carbon management and utilization, providing economic sustainability and environmental accountability in the energy industry. We believe that low carbon intensity and profitability are not mutually exclusive.

Our mission is to revolutionize the fuels of today to provide a bridge to the fuels of the future.

Expander Energy Inc. is a privately held energy company located in Calgary, Alberta, Canada.
